Revolutionizing Workforce Mobility

ARCOS Mobile Workbench is a utility-specific mobile workforce management solution that empowers crews to seamlessly manage planned & unplanned work in one simple, intuitive cloud-based system. It empowers your team with ONE app to improve situational awareness, creating a complete, real time street level view of assets, work status, and crew location (native and non-native) to drive operational efficiency, transparency, and safety in the field during routine jobs, long cycle work, and storm events.

Top Benefits for Electric, Gas & Water Utilities

- **Shrink Field Service Costs**
- **Match the Right Job & Technician**
- **Bring the Right Tools for the Job**
- **Accelerate Insurance & FEMA Payments**
- **Boost Customer Service Metrics**
- **Ensure Maximum Crew Safety**
- **Complete More Jobs in a Day**
- **Automate Manual Processes**

One Mobile Solution for Both Planned and Unplanned Work Events

Scheduled Maintenance
Routine updates to field assets

New Construction
Build new assets and successfully place them in service

Vegetation Management
Routine inspection and trimming of vegetation to protect ROW

Inspections
Meter reading and routine Inspection of assets

PLANNED

UNPLANNED

Damage by Outside Party
3rd party accidentally damages utility-owned asset

Storm Events
Storm creates large scale asset damage and outages

Equipment Failure
Respond to failed or abnormal assets which cause impact to service

Outage
Customer outage requires first responder assessment to determine what work is needed

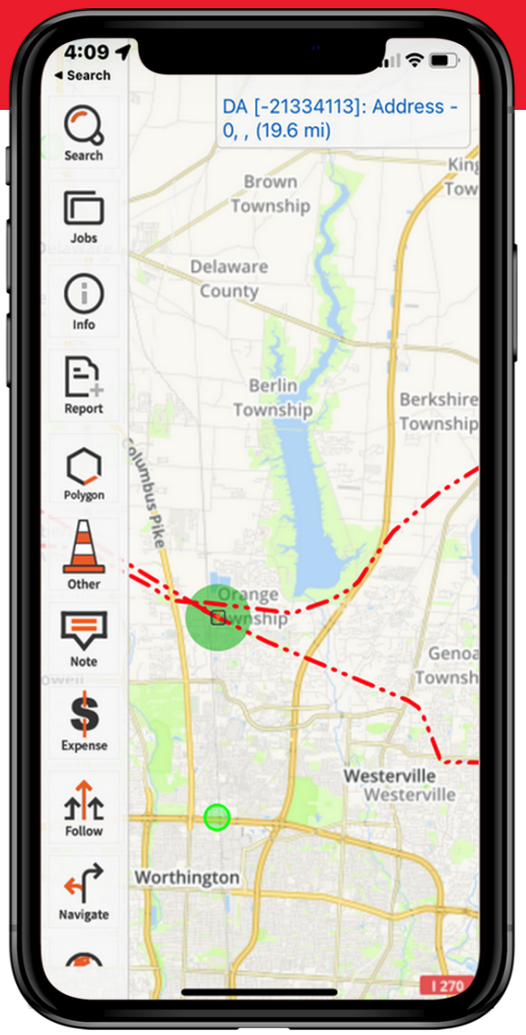
Mobile Workbench at a Glance



Features Designed for Crews by Crews

Provide a seamless and intuitive user experience on mobile devices in the truck or on the job. Ensure user adoption with features purpose-built for field workers such as creating notes instantly with voice-to-text for hands free, spellchecked dictation.

Built In Time Sheets

Mobile Workbench eliminates manual time tracking steps and duplicated effort for crews and supervisors. Plus, automatically push time sheets into your payroll system with approval workflows and gain more insight into crews by instantly calculating windshield and wrench time KPIs.

Configurable Mobile GIS Interface

Mobile Workbench is tailored to fit your team. Setup icons and colors in your own company standards to map structural, transport, switchable, and non-switchable assets alongside work and supporting documents, photos, and videos.

Connect the Field & Back Office

Mobile Workbench brings all of your disconnected systems together through powerful API integrations, enabling real time communication between the field and back office.
