

THE FUTURE OF SHIFT MANAGEMENT IS HERE.

MANAGE PEOPLE - NOT PAPER.

RosterApps is a shift management solution that offers superior shift filling, swapping and bidding capabilities, with employee self-service - accessible anytime, anywhere. Presented as an SaaS web application, RosterApps does not require you to install, update, or maintain any equipment.

WHY ROSTERAPPS?

- Ensures schedules are quickly covered for minimum staffing levels while adhering to bargaining agreements
- Return time to supervisors to be on the floor instead of filling and adjusting shifts
- Enables employees with an online self-service model to accept, bid on and swap available open shifts with other employees, giving them more control over their schedules, within your established business rules
- Provides one source of truth in one system with complete work log history for valuable reporting
- Maximize your existing investments in HR systems, and provides real-time and historical data to streamline payroll accuracy

FEATURES:

- Administrators can create shift/vacation bids, manage employee information, and more
- Cloud-based and highly secure to meet the security requirements of critical infrastructure companies
- Flexible and configurable rules that can vary by work group, section, plant or individual employees
- Electronically approve/deny requests, assign overtime, mark employees late/absent
- Automatic email and text notifications
- Employee self-service including shift bidding, vacation bidding, trade requests, time-off requests, and overtime requests
