arcos® RosterApps

THE FUTURE OF
SHIFT MANAGEMENT IS HERE.

MANAGE PEOPLE - NOT PAPER.

RosterApps is **a shift management solution** that offers superior shift filling, swapping, and bidding capabilities, with employee self service - accessible anytime, anywhere. RosterApps does not require you to install, update, or maintain any equipment.

WHY ROSTERAPPS?

- Ensures schedules are covered for minimum **staffing levels** while automatically applying company policies

- Returns time to supervisors to concentrate on administrative tasks instead of filling and adjusting shifts

- Provides employees with a managed self service model to accept, bid on, and swap available open shifts with other employees, giving them more control over their schedules, within your company policies

- Maximize existing investments in HR systems with our powerful API, and provides real-time and historical data to streamline payroll accuracy

FEATURES:

- Administrators can create shift/vacation bids, manage employee information, and more

- Web-based with security protocols specific to critical infrastructure providers

- Flexible and configurable rules that can vary by work group or individual employees

- Electronically approve/deny requests, assign overtime, mark employees late/absent

- Automatic email and text notifications

- Employee self-service including shift bidding, vacation bidding, trade requests, time-off requests, and overtime requests
